FIRST- The New Truck-Slot System

In 2018 the proven truck routing system was extended to include a slot system. It sends a notification of the truck already at the time of ordering the forklift truck required for loading or unloading. The Slot System ensures accelerated handling of the truck and autonomously reserves the required parking space in front of the relevant hall at the desired point in time.

The slot can only be reserved in conjunction with a forklift truck or crane and is booked bindingly with the accredited trade fair forwarding agent. The booking fee is € 20.00 € per slot. The loading/unloading time is fixed and is usually observed. Due to delays in the course of the trade fair, however, the times may be postponed, especially to a later date. Claims for damages or stand fees are expressly excluded. Please note that the slot booking is associated with the provision of a forklift. Even if the forklift is not used, a provision fee of 140.00 € Euro will be charged.

General Conditions

1. The register of forwarding charges comprises forwarding services which the forwarder performs on the fairgrounds as a contractual partner of the Messe Düsseldorf GmbH. Services not included herein are offered upon request.

Messe Düsseldorf GmbH transfers to the contractually appointed forwarder the exclusive right to perform all forwarding services on the fairground such as delivering exhibits and moving stand structures to and from the stand, additionally providing auxiliary devices and personnel for assembly and dismantling work, storage as well as customs clearance for temporary and/or definitive imports and re-exports.

2. All orders are subject to the “General German Forwarding Conditions“ (ADSp) - latest version - or the conditions of the Federal Group of Heavy Transport and Crane Specialists (BSK) , including this fairground forwarding service register. The conditions can be studied on the business premises of the fairground forwarding company.
Place of fulfilment and place of jurisdiction for both parts is Düsseldorf.
All charges and expenses are due immediately after the service is performed. The forwarding company is entitled to demand a guarantee or advance payment for all services ordered according to this tariff.
3. The liability of the forwarder ends upon setting down the fair goods or empty freight at the exhibitor’s stand even if the exhibitor or his representative is not present. Liability for return transports begins once the goods are collected from the stand, even if the return-shipping-document/order were already deposited in the contractual forwarder’s office at an earlier stage.
4. The forwarding company takes over and stores empty or full freight solely by order.
If empty freight is left without instructions in or in front of an exhibition hall immediately before the opening of an event, the contractual forwarder can be obliged by an order from the organizer/fairground operator to move away and store the goods even if the forwarder is not in possession of the relevant order by the exhibitor. The ensuing costs will be charged to the exhibitor.
Transport and storage of empty or full freight is insured only by a separate written order.
Only genuinely empty packaging can be handed over as empty freight. No liability is accepted for any contents of packaging handed over as empty freight. A return delivery after the end of the event can only be ensured if, when handed over to the forwarding company for collection, the empty freight is sealed or tied up for secure transportation and labelled with a name, hall and stand designation.
5. Complaints and reports about damage of any kind whatsoever must be submitted to the forwarder’s office in due time and in writing.
6. The register of forwarding charges takes effect as of 01/01/2021 and expires on 31/12/2021. All payments are net prices. The local applicable, statutory sales tax rate (VAT) is stated and must be paid in addition.
7. The guidelines issued by the organizer for the respective events shall apply to remaining aspects.
